SK.IN
SKILLS FOR INCLUSION

**1-AFTER THE
ITALIAN TC**

**2-LOCAL
WORKSHOPS
PREPARATION**

3-NEXT STEP

This project is co-funded through the European Union's programme "Erasmus+

Erasmus+

1- After the Italian TC

After the involving Italian Training Course, participants have come back home with common methods and activities for facilitating the development of skills in fewer opportunities adult learners and have got a new level of confidence in the international group. Now it will be easier to talk a common language!

2- Local workshops preparation

In these months the work has been the preparation for the 6 local workshops: they will be held between October and November 2017 in Italy, Greece and Romania.

In Italy they will be performed by Associazione Agrado in a Secondary school, with students already 18 years old but still in the first classes for different reasons (education difficulties, improper behaviour, migrants,..)

In Greece they will be performed by Dimitra in workshop for unemployed people, and in Romania by Satu MAre Prison with the inmates of the same penitentiary.

The workshops have as aims the acquisition of soft skills to the fewer opportunities learners in order of an easier inclusion in society and in job market.

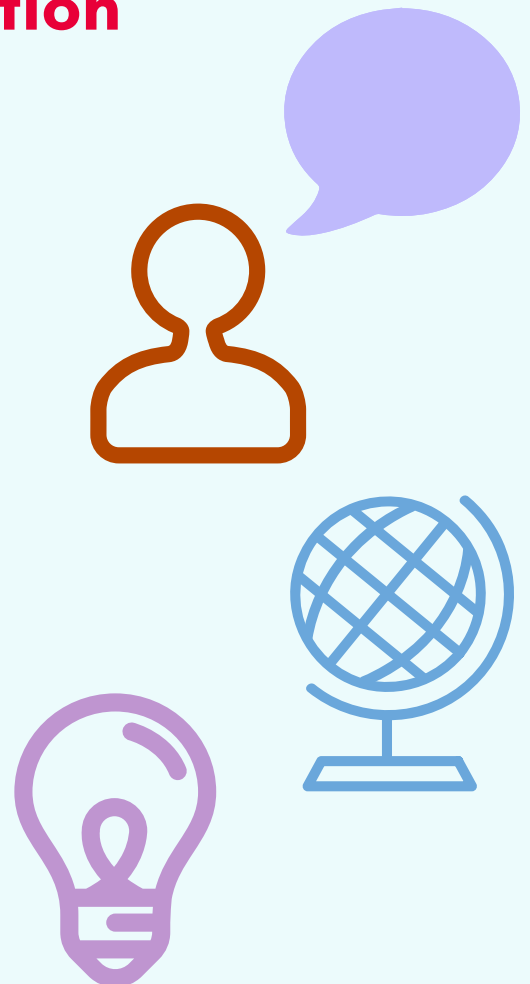

The methods and tools will be those presented by Ha Moment and Agrado during the Italian T:C: non formal activities, with theories and tools from Theatre of oppressed, Non violent Communication, Transactional Analysis.

Furthermore we will experiment in local level the skill recognition tool of open digital badges.

In the meantime each organisation has taken care to adapt the common tools, presented in the Italian TC to their learners needs.:

1.Zero measurement tool, questionnaire to measure level of competences before and after the workshops.

2, Preparation of the Badge set for the local workshops. (graphic, description and tasks to claim these).

Badgecraft will take care to upload these Badges on Badgecraft website. Here we present our six badges, connected with six competences that we aim our learners develop: Self-awareness, Communication, Negotiation, Problem-solving, Learning to learn, Emotional management.

3- Next step

Waiting for Local workshops now and collecting all the results to bring to Satu Mare Transnational Meeting, in Romania from 11 to 15 December!!
